

Don't pay twice for your laser gas!

Reduce downtime and gas wastage with our cost-effective supply options.

PACKS

At Air Products we have some of the largest volume packs in the industry: 40% more gas than conventional cylinder packs offering you significant operational and cost benefits.

For high quality, ultra clean laser or plasma cutting, the 18 cylinder nitrogen pack from Air Products will keep you operating for longer. With 233m³ (233,000 litres) of gas, the pack has up to 40% more gas than conventional cylinder packs, offering you significant cost benefits.

Recognising the importance of the purity of nitrogen for laser or plasma cutting, Air Products offer nitrogen with a purity of 99.999% (5.0 Grade).

The high-volume cylinder pack is available in a range of pressures up to 300 bar suitable for even the most powerful machines.

Our cylinder packs improve your profitability:

- Increasing available cutting time between cylinder pack changes
- Reducing holding stocks
- Reducing the number of deliveries
- Reducing overall rental costs

LIQUID

A compact on-site liquid supply solution - our high-pressure CryoEase® service allows your gas to be refilled while your machine keeps running, eliminating any loss in production. There is also no need to vent down your tank and lose gas you've already paid for.

- Eliminate downtime – tank can be refilled whilst your laser machine is running
- Saves time, improves safety – no more handling or changing of cylinders
- Saves space – tank can be sited conveniently to relieve valuable floor space
- Peace of mind – our CryoEase® service automatically schedules regular deliveries, saving you the hassle of raising orders or waiting for deliveries

If you are buying a new laser...

It is really important to consider your gas supply mode and gas supplier early in the process. The correct choice of gas supply will have an impact on your overall laser running operation costs and laser cut quality. Feel free to contact at us at any time in your decision process – with such a large range of supply options we are sure to have a solution to suit your business.
